

MEDICAL

630 HUMANFORM[®]
Procedure Chair

Healthcare is changing. Are you changing with it?

Healthcare has been changing at an unprecedented rate. There are more patients, fewer providers, and patients are trending away from hospitals into ambulatory care settings. Having the right combination of technology and workflow is more important now than it ever has been.

Position yourself + your patients for **outpatient procedures**

Since the 1980s, ambulatory procedures have been steadily increasing. With improved technology and advancements in anesthesia and pain management, the number of procedures being performed on an outpatient basis is expected to continually rise.¹ Is your facility equipped to handle this migration of care?

48.3 million

Number of outpatient procedures performed in the US in 2019²

18%

Procedures in physician offices projected to increase 18% through 2032³

Procedures can be lengthy for caregivers + patients

50.2 MINUTES

Median procedure room time per patient encounter⁴

17.2 CASES

Number of cases per day at a typical ambulatory surgery center⁵

MIDMARK CAN HELP

The Midmark 630 HUMANFORM[®] Procedure Chair is designed with precise positioning and more humanlike movement to provide better accessibility and ergonomics for patients and caregivers.

Bringing patient + provider together comfortably + safely

Since the inception of the Americans with Disabilities Act (ADA), accessibility has become a legal requirement. But more importantly, accessible design is instrumental in providing better care. The federal agency providing leadership and guidance for accessible design, the US Access Board, recommends a chair with a low, uncompressed seat height of 17" to 19". The Midmark 630 HUMANFORM® Procedure Chair can lower to a height of 19" (non-rotational models) and can be moved into a low, flat position. The low seat height and wide, flat transfer surface can help enable patients to transfer onto and off of the procedure chair with minimal assistance, improving safety for the patient and caregiver.

Natural, humanlike movement
patients will appreciate

01 BARRIER-FREE DESIGN

helps address the needs of a changing patient demographic with a 19" low seat height and 650-pound weight capacity.

02 MOTION PROFILING®

adjusts the chair as the patient moves to help maintain head and back support. This exclusive feature is designed to eliminate the need for patients to reposition as the chair back section raises or lowers.

03 FOOT EXTENSION

extends the chair footrest to accommodate taller patients with the touch of a button.

04 PREMIUM COMFORT SYSTEM®

combines unique, contoured upholstery and an adjustable footrest to cradle the patient for a soothing, chair-like feel.

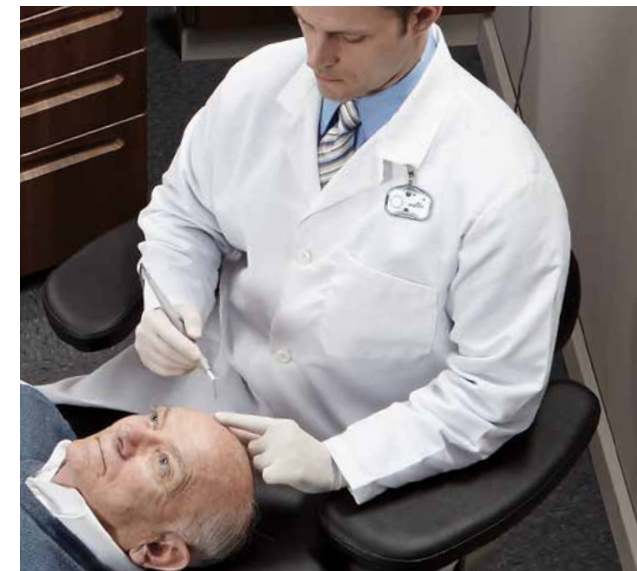

Better position caregivers for outpatient procedures

No matter the type of procedure, proper positioning is necessary for unobstructed access to the patient and a clear view of the surgical site. Like the human body, the Midmark® 630 has virtually endless movement capabilities. Power height, back, foot and tilt gives healthcare providers the freedom to effortlessly move patients into the most effective positions.

1 out of 5
 Of all injuries reported in the US is healthcare related⁶

3x
 Healthcare workers are almost three times as likely to suffer from work-related injuries than construction workers.⁶

CAREGIVER ERGONOMICS

When performing outpatient procedures, it's important to choose a procedure chair that provides clear access to the patient and procedure site. But have you considered provider ergonomics? The Midmark 630 HUMANFORM® Procedure Chair is designed with features that help ensure ample access to the patient while maintaining a proper working position whether seated or standing.

PRECISE MEDICAL POSITIONING

LITHOTOMY
 Position patients for lower-body procedures

ELEVATED FLAT
 Can improve access and visibility to the patient's head, neck and torso

BARRIER-FREE ENTRY
 Low height of 19" allows for better patient access

TRENDELENBURG
 Widely used as a first-line treatment of acute hypotension and/or shock

ADJUSTABLE HEADREST DESIGN

Articulating Headrest
 Tilt the patient's head or adjust for different procedures, improving access and patient comfort.

Tool-Free Adjustment
 Simply loosen the knob, rotate the headrest up or down and retighten.

Intelligent features make time with patients more efficient

As the number of procedures performed in ambulatory care settings increases and the number of patients you see grows, you're going to want to make the most of the time you have with patients. That's why it's good to have a Midmark 630 HUMANFORM® Procedure Chair in your corner.

Programmability is positioning made easy

The Midmark® 630 can store up to four of your most used positions. With the touch of a button, all sections of the chair move simultaneously to quickly and precisely move the patient to the desired position. (Programmability is an optional feature.)

MAKE THE MOST OF THE SPACE YOU HAVE WITH ROTATION

With the optional rotation feature, you no longer have to drag heavy devices around the chair or the patient. You can simply move the patient for better access.

ELECTRICAL OUTLETS

Hospital-grade outlets on each side of the chair allow you to easily power ancillary devices at the point of care. (Not available on rotational or 230 V models.)

WIRELESS CONTROLS

Locate your hand and foot control anywhere in the room without having to worry about trip hazards or cords. A low battery audible indicator will sound when it's time for a battery replacement.

ACTIVE SENSING TECHNOLOGY®

Avoid impact or disruption while moving the chair. Active sensing technology pauses chair movement when disrupting impact is detected.

Accessories

ACCESSORIES HELP ADD VERSATILITY + FUNCTION TO YOUR PROCEDURE CHAIR

OVAL HEADREST

12.7" H x 12.3" W

EXTENDED HEADREST

SPECIFICATIONS

Patient Weight Capacity:
650 lb (295 kg)

Height:

Minimum 19" (45.7 cm)
Maximum 40" (101.6 cm)

Seat Tilt Angle Range:
0° to 30°

Back Support Angle Range:
0° to 80°

Foot Support Angle Range:
0° to 90°

28" Upholstery Width Dimensions:
Headrest: 12" (30.5 cm)
Back support: 26.5" (67.3 cm)
Seat: 28" (71.1 cm)
Foot support: 23" (58.4 cm)

32" Upholstery Width Dimensions:
Headrest: 12" (30.5 cm)
Back support: 31" (78.7 cm)
Seat: 32" (81.3 cm)
Foot support: 23" (58.4 cm)

Patient Support Surface Length:
Flat position: 72" – 76"
(182.9 – 193 cm)

Paper Roll Holder:
Holds 18" x 3.5" paper roll
(45.7 x 8.9 cm)

Stirrups are standard.

Electrical Ratings

115/230 VAC, 12/6 A, 50/60 Hz
(for standard models w/receptacle)

115/230 VAC, 9/4.5 A, 50/60 Hz
(for rotation models)

Electrical Outlet Rating:
115 VAC, 3 A

Options

Premium Upholstery Top:
Seamless design

Premium UltraFree Top:
Seamless, PVC-free design
